- 3 research centers
- 15 to 1 student-to-faculty ratio
- 410 peer-reviewed achievements by faculty (2010–2011)
- 1 Fulbright Scholar
- 2 out of 3 years faculty from the College received the Grisham Master Teacher Award, the top university honor (2009; 2010)
The Building Construction Science program is designed to prepare students for careers in construction or construction-related fields. Graduates will be able to manage construction projects and the business of construction. Through an immersive, integrative, collaborative, and transformational education, students are prepared for twenty-first century professional thinking, practice, and problem-solving.

The School of Architecture offers the only NAAB-accredited professional architecture degree in Mississippi. The profession of architecture offers students the opportunity to participate in improving the physical world, solving problems of our society, and giving form to the needs of modern culture. An intense, carefully structured, and rich array of courses provides students with the unique knowledge and abilities required of architects in this modern world.

The Department of Art houses the largest studio art program in Mississippi and is a vital and growing twenty-first century art and design program. The Bachelor of Fine Arts is a professional studio degree earned after successful completion of an intense program with a series of in-depth studio experiences balanced by studies in art history, the humanities, and sciences. Concentrations include ceramics, drawing, graphic design, painting, photography, printmaking, and sculpture.

The Interior Design program, accredited by the Council for Interior Design Accreditation, offers students a broad background in interior elements, materials, sources, and practical experience in the business of interior design. Interior design is an exciting, challenging, and ever-changing profession. The program prepares students by developing the skills needed to create functional, efficient, and aesthetically pleasing residential and commercial interior environments.
